illustration shows a cellar whose walls and roof are built of concrete, walls are five inches thick and can be made by digging the hole suf-Sciently large to construct false work and leave an open space of five inches for the concrete. The roof is arched and the concrete can be put on false work to the proper thickness and smoothed over on the outside with a trowel. Tile with metal coverings over one end are fitted in the top of the arch for vents. Fig. 1 shows the plan of the ceifar with proper dimenstons, Fig. I the doorway and Fig. 3 a cross section through the center. There is no danger of the roof blowing away or being caved in with a piece of flying timber.

Itching Torture Was Beyond Words-Slept Only from Sheer Exhaustion -Relieved in 24 Hours and

Cured by Cuticura in a Month.

"I am seventy-seven years old, and some years ago I was taken with eczema from head to foot. I was sick for six months and what I suffered tongue could not tell. I could not sleep day or night because of that dreadful itching; when I did sleep it was from sheer exhaustion. I was one mass of irritation; it was even in my scalp. The doctor's medicine seemed to make me worse and I was almost out of my mind. I got a set of the Cuticura Soap, Ointment and Resolvent. I used them persistently for twenty-four hours. That night I slept like an infant, the first solid night's sleep I had had for six months. In a month I was cured. W. Harrison Smith, Mt. Kluco, N. Y., Feb. 3, 1908." Putter Drug & Chem.
